PROBLEM

The handwriting of each and every person will be unique and everyone has different speed of writing. So, the handwritten digit of number zero to nine, which we also use for encryption, sometimes, the user differentiates 0 and 1, 2 and 3, 4 and 5, 6 and 7 and these digits have similarities among them. So, it is difficult for computers to recognize the manually written digits and this is one of the major challenges faced in the fast growing technological world. The appearance and formation of digits is mostly influenced by the uniqueness and variety in the handwriting of the different people.

Group ideas

Take turns sharing your ideas while clustering similar or related notes as you go. In the last 10 minutes, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you and break it up into smaller sub-groups.

20 minutes

TIP

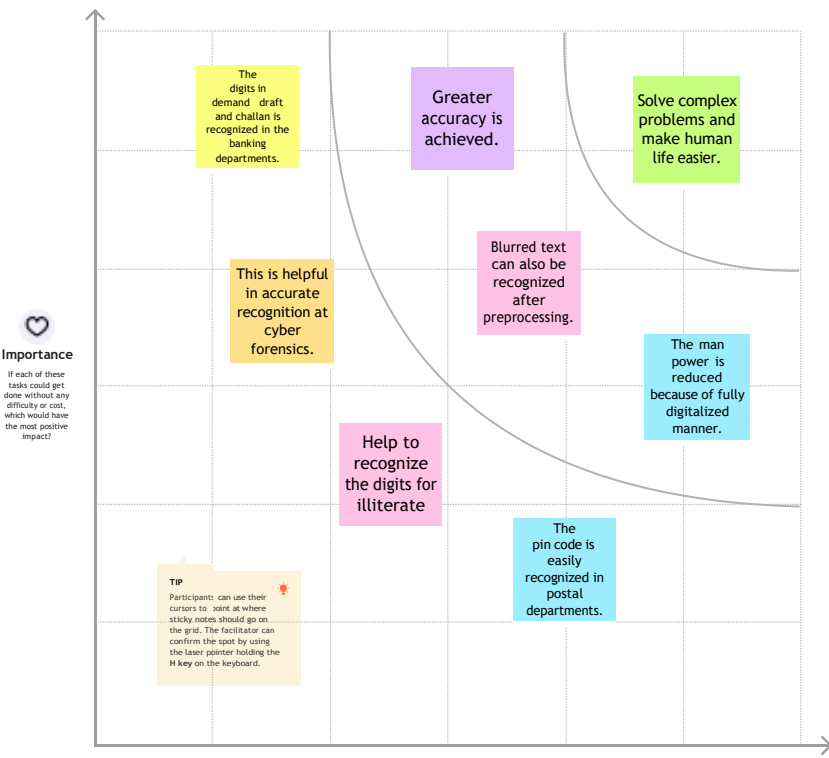

Add customizable tags to sticky notes to make it easier to find, browse, organize, and categorize important ideas as themes within your mural.

Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

20 minutes
